Bank Reconciliation

Exporting payments to excel will assist with bank reconciliations.

Click the **Export Payments** and download the file. You will see a Spreadsheet with multiple columns - the one to the right shows the last few.

To reconcile payments

- The **disbursement record** on your bank statement corresponds to the **settlement receipt** number on the export - shown on the right

Note:

Payments are deposited into the bank account in one lump sum on a daily basis.

So if three payments are made in one day:

- Your bank statement will show one record totalling all three payment sums with a **disbursement number**
- The export will have three records showing each payment, but all three records will have the same **Settlement Receipt number**
- The disbursement number and settlement receipt number will correspond
